Community
of Practice

The Cohesion for Transitions (C4T) Community of Practice

The Cohesion for Transitions (C4T) Community of Practice is a community-based platform that supports EU Member States and regions to make better use of Cohesion Policy investments for sustainability transitions under Policy Objective (PO) 2 — a greener, low-carbon transition towards a net zero carbon economy and resilient Europe.

The C4T is open to Managing Authorities, intermediate bodies, regional and local authorities, and other stakeholders involved in PO2 implementation. **Join the C4T Community of Practice and benefit from the offered support:**

**Tailored technical
assistance**

**C4T Working
Groups**

**Collaborative
problem-solving**

**C4T Academic
Sounding Board**

**Actionable science-
policy insights**

C4T GROUNDWORK

C4T GROUNDWORK technical assistance provides tailor-made support to authorities across European regions to effectively implement sustainability investments with Cohesion Policy. The aim of the investments is to support the European Green Deal. It covers a wide range of thematic areas under PO2, including energy efficiency, renewable energy, climate change adaptation, sustainable water management, circular economy, protection and preservation of nature, biodiversity, and green infrastructure.

Learn more about how the C4T GROUNDWORK has supported multiple beneficiaries already in addressing diverse challenges (e.g. setting up energy agencies, developing concepts for nature-based solutions, improving climate proofing procedures) by looking at the [C4T GROUNDWORK Factsheets](#). For more insights, explore the [C4T Technical Assistance Inspiration Catalogue](#), showcasing examples of tailored support services.

Real-world impact C4T GROUNDWORK testimonials

Alexander Boto Bastegieta
General Director of Ihobe

“The support we have received from the C4T GROUNDWORK has allowed us to obtain a solid basis on which to work to achieve a proactive and targeted climate adaptation in the Basque Country.”

Elisabetta Neroni
Managing Authority of the RP ERDF Sardinia

“Thanks to the C4T GROUNDWORK, the Autonomous Region of Sardinia had the opportunity to deal with a practical application of climate proofing, highlighting the aspects which need to be improved in order to increase our expertise.”

C4T Working Groups

The Working Groups on Energy, Climate Change and Environment are collaborative platforms where stakeholders from various sectors can share best practices and engage in practical actions aimed at advancing sustainability investments.

The Working Groups include Managing Authorities, intermediate bodies, regional, local, and other public authorities, as well as other stakeholders involved in the implementation of PO2 investments. They meet regularly to exchange experiences and co-develop solutions to shared challenges. As part of their activities, they have developed a [compendium of good practices](#) that serves as a valuable source of inspiration for peers implementing sustainability investments.

C4T Academic Sounding Board

The Academic Sounding Board is a scientific forum composed of high-level academics providing evidence-based insights to support public authorities in implementing effective sustainability investments. Through Knowledge Pieces, the Academic Sounding Board addresses challenges raised by Working Group Members, offering analytical insights and policy recommendations.

Knowledge Pieces are available through the [C4T Knowledge Repository](#), ensuring stakeholders can access practical guidance to support sustainability transitions.
